Potts

Robinson

Campus Wi-Fi is already installed in your building. Do NOT connect a personal wireless router.

Connect your phone, laptop or tablet

eduroam

RECOMMENDED

1. Open your Wi-Fi settings.
2. Select **eduroam**.
3. Username: your full Tech email (username@latech.edu).
4. Password: your Tech password.
5. Accept or trust the security certificate if prompted.

Best choice for most phones, laptops and tablets.

LaTechWPA2

ALTERNATE

1. Open your Wi-Fi settings.
2. Select **LaTechWPA2**.
3. Username: your Tech username (example: abc012).
4. Password: your Tech password.
5. Accept the security certificate if prompted.

Android 11+ users should use eduroam.

Connect a TV, game console or streaming device

These devices usually cannot sign in to eduroam or LaTechWPA2. Register them first, then join LaTechIoT.

- 1 **Find the device's MAC address** — look in its Network / Internet / System settings.
- 2 **Open WiFi Manager** — on a phone or computer go to wifimgr.latech.edu and sign in with your Tech credentials.
- 3 **Select Create Device.**
- 4 **Enter the device details** — MAC address, a device name, and accept the Terms of Use.
- 5 **Write down the generated Wi-Fi password** — you will need it on the device.
- 6 **Join LaTechIoT** — on the TV or console select LaTechIoT and enter that password.
